Phone 517-335-7211, Fax 517-332-1428

FACILITY ID NUMBER

NOTICE OF UNDERGROUND PIPING REPLACEMENT

This information is required pursuant to Part 211, Underground Storage Tank Regulations, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. An owner/operator who fails to notify is subject to a misdemeanor and/or civil penalties, not to exceed \$5000 per violation.

**INSTRUCTIONS: NOTICES WILL ONLY BE ACCEPTED ON THIS FORM.**

Please type or print clearly. **ALL** information must be completed.

This form must be received by the Storage Tank Division 15 days prior to the commencement of work indicated. The 15-day notification may be waived for emergency situations with prior approval from the department. It is recommended that the Hazardous Materials Storage Inspector of the Bureau of Fire Services be notified two (2) days prior to the work being performed.

This form is to only be used for Bureau of Fire Services notification when there is replacement of more than 50 percent of the length of any underground piping between the tank and the dispenser at any one time. If a total underground storage tank (UST) system (tank and piping) replacement is to be performed, use form BFS-3820. Subject to Part 211, Underground Storage Tank Regulations, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, a UST must be registered by the current owner and have all fees paid to be considered registered with the Bureau of Fire Services. The UST owner/operator (O/O) or agent must complete this form as instructed, and submit it to the Bureau of Fire Services. A site assessment shall be conducted during the replacement, with results sent to the Bureau of Fire Services. The O/O must also submit an amended registration form notifying the Bureau of Fire Services of the piping replacement within 30 days after the date of the replacement.

Pursuant to Section 21107 of Part 211, a person who removes or installs UST systems shall maintain pollution liability insurance of not less than \$1,000,000 per occurrence.

A confirmed release must be reported to the Bureau of Fire Services within 24 hours. A confirmed release waives the requirements of conducting a site assessment. Once reported, the O/O will be informed regarding rules for further testing and cleanup activities. Releases may be reported by fax to 517-332-1428.

If you have questions regarding these instructions, please contact the Bureau of Fire Services, Storage Tank Division, at 517-335-7211.
